

Today's Science

News Service Database

“...solid...Recommended.”—**CHOICE**

“Designed with classroom use in mind...a solid science source...presents scientific topics in an engaging way.”—**AMERICAN REFERENCE BOOKS**

ANNUAL

“...a true curriculum-oriented science resource...a solid reference database...useful...”—**SCHOOL LIBRARY JOURNAL**

Accurate, Engaging, and Timely Articles Written Especially for Students

Today's Science bridges the gap between the science taught in the classroom and real-world discoveries. Updated twice a week, *Today's Science* gives in-depth explanations of important advances in biology, chemistry, environmental science, space, physics, and technology, and features interviews with the scientists doing the research. An 18-year backfile lets students see how one scientific advance leads to another; the stories focus on the questions scientists ask themselves, and in doing so, reinforce science educators' traditional emphasis on the scientific method.

HIGHLIGHTS:

- **SCIENCE NEWS, WRITTEN FOR STUDENTS**, updated twice a week
- **NATIONAL SCIENCE EDUCATION STANDARDS** and a **SCIENCE FAIR GUIDE**
- **“NEED A RESEARCH TOPIC?”**: summaries of key topics linked to related articles to jump-start student research
- **RICH RESOURCES**: thousands of editorial cartoons, photographs, diagrams, and crossword puzzles
- **CONVERSATIONS WITH SCIENTISTS**: first-person accounts of recent breakthroughs
- **CURRICULUM TOOLS**: research tools, activities, and assignments for students and educators.

FEATURES:

- Extensive biographies, focusing on more than 2,000 scientists—from historic figures to modern-day innovators
- Pop-up Glossary
- Searchable *Science Encyclopedia*
- Links to related news coverage and encyclopedia entries
- Persistent record links
- Citations display in *MLA, 7th Edition* style, with APA guidelines.

ISBN 978-1-57852-028-2.
