

UQL Cyberschool Subject Guide: Analysing Repertoire

Getting started

What information are you seeking? Write down key words from your assignment topic to use in your search. Make a list of keywords and synonyms you will be able to use as search terms.

Keywords	Synonyms

Now start your search for information.

Reference

If you are not sure what your topic is all about, look it up in a dictionary or encyclopaedia. Start with definitions, maps, timelines or biographical snapshots, to put your topic into perspective.

Title	Location	Call Number
Contemporary composers	Architecture Music Ref	ML105 .C66 1992
The Oxford Companion to Music	Architecture Music Ref	ML100 .O9 2002
New Grove dictionary of music and musicians	Architecture Music Ref	ML100 .N48 2001 v.10
The concise Oxford dictionary of music	Architecture Music Ref	ML100 .K34 1996

Books

Books are a good starting point. Use the Keyword search option in the Library catalogue. You can search on words like **music baroque**, **music classical** or **music romantic piano**.

Try the subject search for subjects such as **Music -- 18th century -- History and criticism.**, **Music -- 19th century -- History and criticism.**, and **Music -- Philosophy and aesthetics.**

You can also browse the catalogue using subject keywords to find SUBJECT HEADINGS, or browse the shelves at the CALL NUMBERS indicated in your research: **ML – Literature on Music**, **M – Music** and **MT – Instruction and Study**

Now add resources you have found, using the Keywords you listed for your topic.

Journals

For recent information, journal articles are often the best sources. Looking through journals in the hope of finding relevant material is time consuming. It is better to use full text databases to find articles on your topic. If your school subscribes to databases through UQL Cyberschool, you can access them at school (or home) through your Library network. See your Teacher Librarian for details and passwords. Some of the databases available to schools for free through your local (Brisbane City) Council Library or the State Library of Queensland are found at <http://www.slq.qld.gov.au/find/articles>

JSTOR	JSTOR is a multidisciplinary archive of high-resolution, scanned scholarly journals. It is not a current issues database. Because of JSTOR's archival mission, there is a gap, from 1 to 5 years, between the most recently published journal issue and the back issues available. Subject areas covered include economics, law, history, Asian studies, Middle Eastern studies, language, literature, music, film studies, performing arts, religion and visual arts.
Humanities & Social Sciences Collection (Informit)	Covers agriculture, arts, Asian studies, business, cultural studies, education, history, indigenous studies, law, media, political science, reference, social sciences, science and technology. Content sources include peer reviewed journals, monographs and books, conference proceedings, research papers and reference materials.

Refer to the Keywords you listed previously to use as initial search terms. For example, to find information about specific musical genres you could search JSTOR, limiting the search to articles with full text, using the phrase such as **music romantic piano** in a Keyword search.
